Diagnostic Procedures

Please mark the appropriate procedure

- Overnight Pulse Oximetry Study**
Patient can check out Oximeter to help physician determine if a sleep study is needed.
- Sleep Study (Polysomnogram, PSG)**
First diagnostic study done. Most insurance require this study be done to show medical need for more studies.
- Multiple Sleep Latency Test (MSLT)**
Rules out narcolepsy or persistent daytime hypersomnolence in patients with no sleep disordered breathing.
- Continuous Positive Airway Pressure (CPAP with Polysomnography Study)**
If PSG shows patient has sleep apnea or other disturbances that will improve with a CPAP machine, the physician will recommend this study.
- PSG Sleep Study with CPAP study to follow.**
Per Interpreting Physician's Recommendation.

**** Please Include: H & P, Chart Notes, Copies of Insurance cards, and current medication list with all referrals.**

Thank You!
